

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I use to get 3 or 4 Calls each day trying to get me to buy something. Now I get maybe 1 a month. Please do something for the voters of this country instead of the lobbyists that try to pay you off to get what they want. Why don't you look out for the people that pay for there home phones and do not want to be bothered by a person/business calling to a phone that we pay for. To me this is trespassing. I have a phone for my convenience not there's. Just because I buy something from a company dose not give them a right to call me and try to sell me something. If I wish to buy something I will look for there adds and pick something that way. I do not want to be bothered by people trying to get me to buy their phone service. I chose the one I want. Let them put adds in the Newspaper, Magazine, Radio, or TV.
